**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 14 March 2002.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adams et al. (U.S. 5,664,990) in view of Kaneko et al. (U.S. 5,114,881).

In regard to claims 1-16, Adams discloses a method of polishing or planarizing a substrate having a metal layer therein (col. 2, lines 5-6), wherein the metal can be titanium, tungsten, copper and many others (col. 2, lines 8-9), with a composition comprising a metal oxide abrasive, wherein the metal oxide abrasive can be silica, ceria and many others (col. 2, lines 16-18) and a liquid carrier (col. 2, lines 18-19), wherein the composition has a pH of about 5 or less, which reads on Applicant's "7 or less" (col. 2, lines 20-21).

Adams is silent about the "total surface hydroxyl group density" of the metal oxide abrasive.

Kaneko discloses that silica has a small density of surface hydroxyl groups, usually from 0.1 to 4 groups (col. 2, lines 50-62). Furthermore, Kaneko discloses that the use of this silica powder helps prevent fractures and cracking in some processes (col. 1, lines 54-58).

It is the Examiner's position that it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Adams by utilizing a metal oxide abrasive with a total surface hydroxyl group density of less than 3 hydroxyl groups per nm<sup>2</sup>, as per Kaneko, because

the use of fine silica with a low total surface hydroxyl group density helps prevent cracking and fractures, which is extremely desirable in the art.

***Response to Arguments***

3. Applicant's arguments filed 3/14/02 have been fully considered but they are not persuasive.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, because the references address different subject matters, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Applicant argues that "the references themselves fail to provide an adequate basis for the asserted combination". However, it is noted that the standard is the existence of a "motivation to combine" and Applicant has not challenged the Examiner's motivations.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1765

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vanessa Perez-Ramos whose telephone number is 703-306-5510. The examiner can normally be reached on Mon-Thurs 7:00am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Benjamin Utech can be reached on 703-308-3836. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-5665.
